

Introducing Our New Interactive Data Exploration Tool

How do I access this tool?

To get started, visit wheelchairstandards.pitt.edu and click on this icon:

What can I do with this tool?

- Explore independently generated cushion performance data
- Compare cushion performance by broad cushion category and CMS code
- Understand cushion performance relative to a reference foam cushion
- Explore individual cushion performance across a variety of tests

How can this tool benefit me?

- This tool allows objective comparison of wheelchair cushion performance using standardized performance measures
- The tool allows cushion developers and manufacturers to benchmark cushion performance and support product performance claims
- The data in this tool can support decision-making tools to assist clinicians and wheelchair users when selecting cushions

How can I get involved?
